Setting the Tone

Pivot Point sets the general tone for price action. This is the middle line of the group that is marked (Pivot). A move above the Pivot Point is positive and shows strength. Keep in mind that this Pivot Point is based on the prior period's data. It is put forth in the current period as the first important level. A move above the Pivot Point suggests strength with a target to the first resistance. A break above first resistance shows even more strength with a target to the second resistance level.
